## Introduction

Askadenya is a restaurant Menu application, specially designed to help the customer choose his favorite meal with ease, which leads to saving time and effort for the customer and the restaurant, knowing that the customer can modify or delete his order.

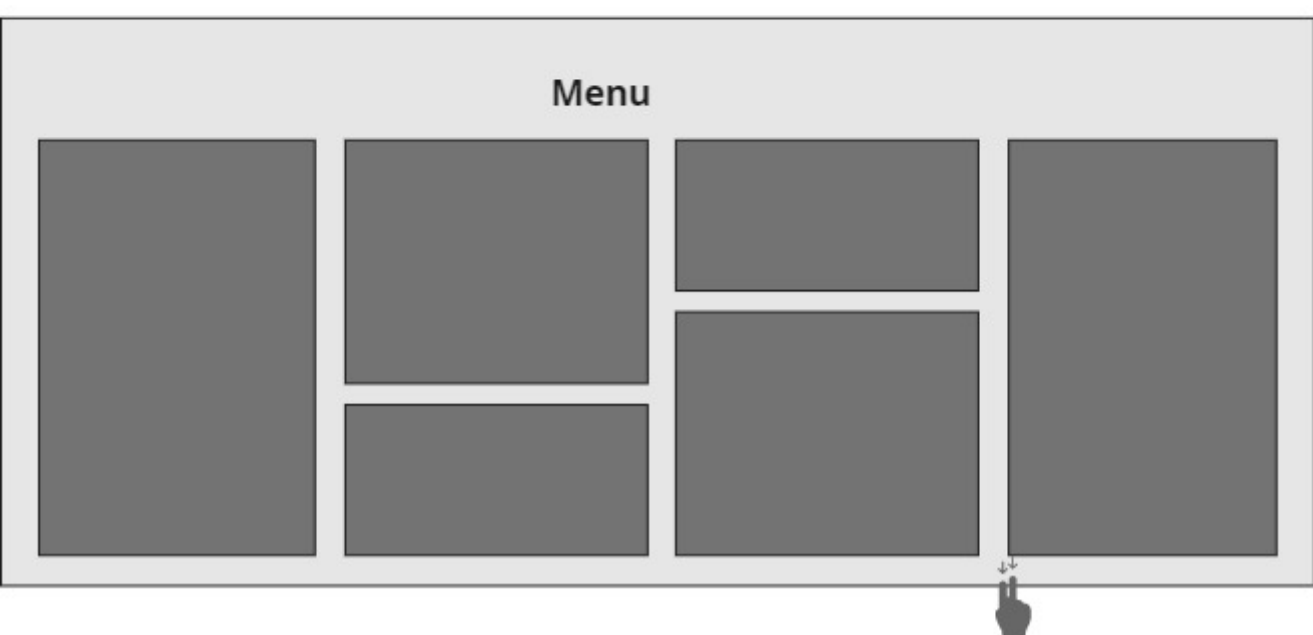

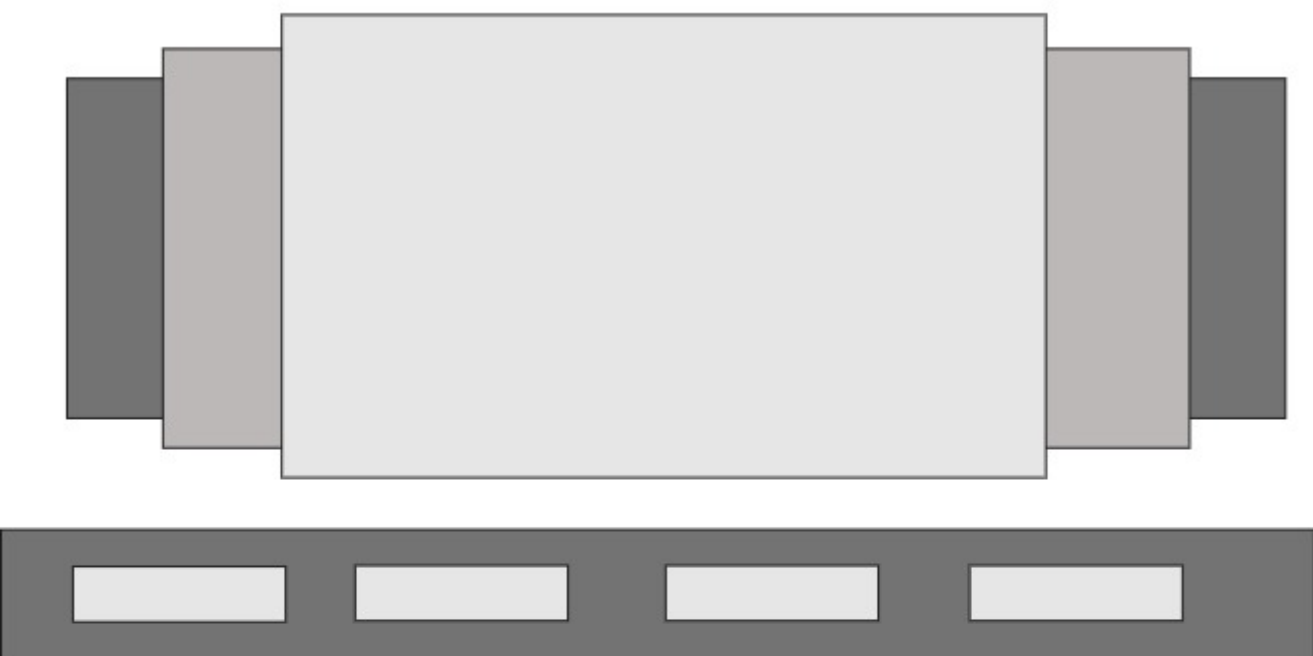

## Workflow

This site was created by the Askadenya team, our team consists of five people, the work was divided into two parts (Backend, Frontend), and the planning was as follows:

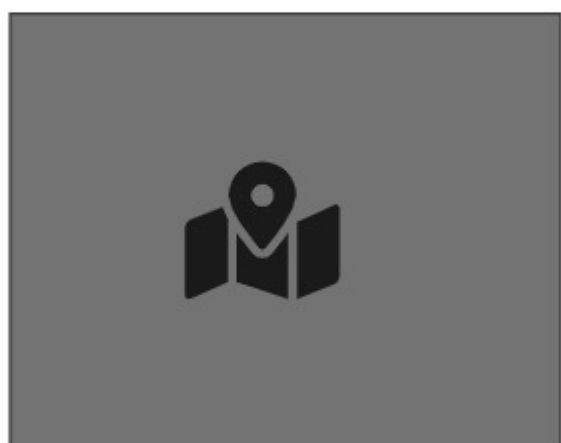

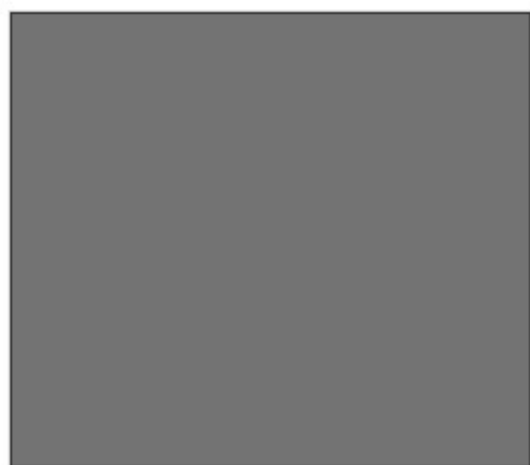

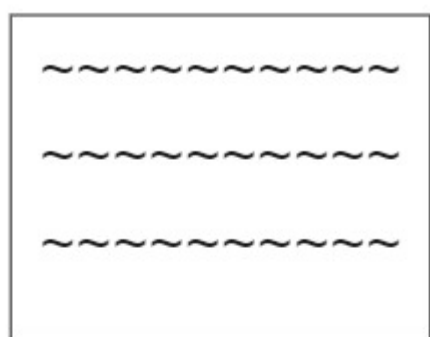

- 1- Project Planning documentation.
- 2- We will cooperate to make wireframe.
- 3- We will work on the visual identity.
- 4- We will division the tasks between the team which will be shown in [Trello](#).
- 6- Presentation.
